DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-27, drawn to a method for conducting a binding assay, classified in class 435, subclass 4.
 - II. Claims 28-40, drawn to an apparatus comprising a plastic cartridge comprising a elongated capture strip, classified in class 435, subclass 287.7.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the invention of group I can be performed by chromatography assays or test strips, while the invention of group II can be used as a filter or selective adhesive.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for one group is not required for others, restriction for examination purposes as indicated is proper.
5. A telephone call was made to Kenneth Sibley on February 5, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1641

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
